Mission20 Zero: Empowering Businesses with Open-Source Solutions

Mission20 Zero, a 7-year-old dynamic technological and digital transformation entity, operates as a subsidiary of the decade-old social enterprise, Mission20. We are dedicated to delivering robust, flexible, and future-ready ERP and enterprise solutions that help organizations achieve operational excellence. As a certified partner of Frappe Technologies, we implement and support ERPNext along with a full suite of Frappe products such as Frappe HR, Frappe CRM, Frappe Insights, Frappe LMS, and Frappe Books, offering a complete ecosystem of open-source business tools for modern enterprises.

In addition to ERP solutions, Mission20 Zero designs and develops custom mobile applications and enterprise software solutions, built to enhance business efficiency and digital agility. Serving clients across diverse industries and regions, we empower small and medium-sized enterprises with ERP Zeroforce (ERPNext Tailored) – a powerful, cloud-ready, and scalable platform that enables end-to-end management of operations, finance, projects, HR, and customer relationships.

Mission20 Zero with the founders of Frappe Technologies at the Frappe community at the Frappeverse 2024, Mumbai, India as a product certified partner

GROUP ERP

Single software for multiple subsidiaries & companies under a single business group, the ERP software has options & modules developed to record transactions of different business types in a single software with individual reports & financial statements to each company & restricted user permissions. The Group ERP also gives consolidated financial statements for analysis & better business decisions.

“According a survey, 47% of the organisations surveyed were in the process of or have completed implementing ERP software. As a start-up or SME, you might be doing well using a basic accounting or inventory software, but once your company hits a specific growth wall, it can become difficult to keep up with growing business needs. Your operations need to become more efficient and streamlined so your business can meet its full potential.”

● MICROSOFT 365 FOR PRIVATE CLOUDS

NEXTCLOUD

**Regain control
over your data**

The most popular open source content collaboration platform for tens of millions of users at thousands of organizations across the globe

NEXTCLOUD USE CASES

Public sector

Governments are moving away from foreign cloud providers amid rising concerns about digital sovereignty and are opting for secure self hosted cloud file storage platforms.

Enterprises

Amid a push to improve efficiency and facilitate remote work through online collaboration technology, enterprises counter a growing compliance, cost and data leak risk by strategic deployments of Nextcloud.

Service providers

Leverage your infrastructure and keep your customers yours with easily scalable, fully branded cloud storage software and collaboration tools.

Education

Education is a heavily regulated industry where protection of academic data and personal information of students with compliant file sync collaboration tools is a top priority.
